

Sheet of household tumble driers

Data sheet for Domestic Tumble Driers

As detailed in EU regulation No. 392/2012

NOTE

" * " Asterisk(s) means variant model and can be varied (0-9) or (A-Z).

1) Energy consumption is measured as the annual 9 kg 258 kWh (8 kg 235 kWh) used per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used.

2) 'standard cotton programme' used at full and partial load is the standard drying programme to which the information in the label and the fiche relates, that this programme is suitable for drying normal wet cotton laundry and that it is the most efficient programme in terms of energy consumption for cotton.

Consumption data can vary from the nominal values given above depending in the size of the load, types of textiles, residual moisture levels after spinning, fluctuations in the electricity supply and any extra options selected.
